# Paper Daffodils

You will need:

- Three spiral templates
- Daffodil picture template
- Yellow, orange and green crayons or felt-tip pens
- Scissors
- Glue

1. Colour the daffodil template and the spirals in yellow felt-tip pen or crayon. Use green for the leaves and stems.

2. Shade along the lines of each spiral in a darker shade of yellow or orange.

3. Cut out the spiral.

4. Glue the cross at the centre of the spiral on to the centre of a daffodil on the template.

5. Add glue to the edges of the spiral so that as you wrap the layers around the centre the layers hold in place. This creates the trumpet for each daffodil.

6. Repeat for the other two daffodils.
